

**ATTENTION PARENTS**

We have purchased Rocky Mountain Sunscreen SPF 30 in bulk dispensers to apply on the children. We used this product the past two years and were very satisfied. Our job was much easier than letting children bring bottles from home, as in previous years. With parent and physician permission and a small fee, we will apply this sunscreen to your child before outside activities. Please do not bring bottles from home. If you choose not to use our product, you will have to apply sunscreen on your child at home before they come to school.

To give permission for your child to use Rocky Mountain Sunscreen at St. John's, please complete the following consent form and return to us with a \$5.00 fee. Your child's physician, as well as a parent signature are required.

Rocky Mountain Sunscreen is dedicated to children's sun protection. The chemicals listed below are standard chemicals used only in top quality sunscreens. Please take a moment to insure your child is not allergic to any of these standard ingredients. Standard active ingredients used in SPF 30 of Rocky Mountain Sunscreen are Octyl Methoxycinnamate, 2-Ethylhexyl Salicylate, Homosalate, and Oxybenzone. (A complete list of all ingredients is available via written request to RMSS Offices, Arvada, CO.)

Rocky Mountain Sunscreen is:

Paba Free	Hypoallergenic	Non-Greasy
Non-Sticky	Waterproof	Aloe Based
Fragrance Free	Moisturizing	

We authorize St. John's Child Care Center to apply Rocky Mountain Sunscreen

SPF 30 to \_\_\_\_\_ for all of his/her outdoor activities.  
child's name

\_\_\_\_\_
